

NORDIC HF CONFERENCE

WITH LONGWAVE SYMPOSIUM LW 07

14-16 AUGUST 2007

FÅRÖ, GOTLAND, SWEDEN

The Nordic Radio Society Foundation invites authors, exhibitors and participants with their families to the 8th Nordic HF conference. Topics focus on HF radio, but include other communication systems beyond the horizon such as meteor burst and troposcatter. VLF and LF systems have been included as there has not been a longwave gathering for years.

HF 07 topics of interest include:

- User requirements and experience
- Interoperability issues
- HF role in network centric warfare
- Propagation studies and modelling
- Interference and noise
- Modulation, coding and link control
- Network architectures
- Equipment and systems
- Software radio concepts for VLF/LF/HF
- Multimedia access and applications
- HF radar
- HF digital broadcast
- Electronic warfare
- Simulation, modelling and evaluation

Take your time to meet colleagues in the unique nature scenery of Fårö, while enjoying modern conference facilities with free internet access. Accompanying family members are welcome.

Contact the HF 07 Secretariat to be included in our mailing list for further information:
